INDEX OF ABSTRACTS
Volume 16 (1969)

Abbott, James H. Variations on Lebesgue domination. Preliminary report, 640.

Abhyankar, Shreeram Shankar. Quasirational points of algebraic surfaces, 542.

Abian, Alexander. On a property of cofinality of ordinal numbers, 323; Independence of the axiom of extensionality, 437; Synergistic models for Z-F, 686; The method of synergistic models, 844; Synergistic models and the axiom of regularity, 981; Consistency of GCH via the method of synergistic models, 1089.

Ablow, Clarence M. A characterizatic finite difference method for the wave equation, 647.

Aczel, J. D. Solution of a general functional equation with five unknown functions having different numbers of variables, 117.

Adams, W. W. Asymptotic diophantine approximations to a basis of a real cubic number field, 90.

Adomian, George. Closure approximation in Stochastic differential equations, 122.

Agarwal, A. K. See Chak, Anand M.

Agoston, Max K. Imbedding manifolds in the conditionally stable range, 326; Isotopies of imbeddings in the conditionally stable range, 430; On the stable suspension homomorphism, 690; Browder-Novikov theory for maps of degree d > 1.I, 1092.

Agrawal, Jagdish Chandra. See Madan, Ved Perkash.

Ahlbrandt, C. D. Disconjugacy criteria for self-adjoint differential systems, 92.

Ahluwalia, D. S. Uniform asymptotic theory of edge diffraction by a wedge-like-object, 112.

Ahmad, Shair and Lazer, Alan C. Oscillatory solutions of a third order linear differential equation, 413.

Aigner, Martin S. On two types of partial geometrics, 243.

Aigner, Martin S. and Dowling, T. A. A geometric characterization of the line graph of a symmetric BIB design. Preliminary report, 586.

Aigner, Martin S. and Prins, Geert C.E. Uniquely partially orderable graphs, 509.

Ahmann, Charles A. The general Stone-Weierstrass problem, 500.

Alas, Ofelia T. A theorem on measure theory, 329; Topological groups and uniform continuity, 434; Topological groups and uniform continuity. II, 696; A characterization of collectionwise normal spaces, 985; Topological groups and uniform continuity. III, 1091.

Alexander, J. C. On mod p connected K-theory, 240.

Alexander, Stephanie. Cylindricity of Euclidean immersions, 682.

Alin, J. S. and Armendariz, E. P. A class of rings with all singular simple modules injective, 123.

Allegretto, Walter. Comparison and oscillation theorems for elliptic operators. Preliminary report, 701.

Allen, Dennis, Jr. A structure theory for finite regular semigroups, 159.

Allen, R. W., Jr. Conditional (P,Q) entropy, 224.

Allen, S. J. and Kline, K. A. On continuum theories of fluids suspension, 297.

Allgower, E. L. Criteria for positive definiteness of certain matrices, 189.

Alo, Richard A. and de Korvin, Andre. Realcompactness and a representation theorem for separating algebras, 665; Algebras of functions generated by some Abelian semigroups, 827.

Alo, Richard A. and Shapiro, H. L. Continuous uniformities, 133.

Altinger, Joseph. Quasi split translations, 287.

Amberg, Bernhard. Extensions of group theoretical properties, 522.

Amer, Mohammed A. and Hanf, William P. Boolean algebras of logics of higher order. Preliminary report, 1059.

Anderson, Bernard C. and Nakano, Hidegoro. Semicontinuous linear lattices, 1063.

Anderson, Bruce A. A class of spaces with T_1-complements, 989.

Anderson, C. H. The linear differential-difference equation with constant coefficients, 177.

Anderson, D. R. Factoring connected sums of tori embedded in codimension one, 191.

Anderson, E. H. An alternative proof that Bing's dogbone space is not topologically E^3, 108.

Anderson, Richard D. The Hilbert cube, 296; A characterization of apparent boundaries of the Hilbert cube, 429; Dense sigma-compact subsets of infinite-dimensional spaces, 640.

Anderson, Richard D. and McCharen, John D. On extending homeomorphisms to Fréchet manifolds, 792.

Anderson, Robert V. See DeCicco, John.

Andrews, G. E. A new property of partitions with applications to the Rogers-Ramanujan identities, 156.

Andrews, J. J. and Sumners, D. W. On higher-dimensional fibered knots, 234.

Anton, Howard. Borel measures on the maximal ideals of a Banach algebra, 319.

Anvari, Morteza. Minimum of a norm subject to a system of D. E., 772.

Apostol, Tom M. Dirichlet L-functions and character power sums, 1059.

Applebaum, Charles H. ω-homomorphisms, 513.

Appling, William D. L. The norm infimum function, 102; An inequality, 665; Zero-one set functions, 828; Concerning part of the Bochner-Radon-Nikodym theorem, 966.

Arbib, Michael A. A characterization theorem for multilinear systems, 419.

Archambault, Sister Claire. See Benac, Theodore J.

Argabright, Loren N. and Gil de Lamadrid, Jesús. A Plancherel theorem for positive definite measures of locally compact abelian groups, 798.

Arima, Satoshi. Canonical systems on double planes, 542.

Armendariz, E. P. See Alin, J. S.

Arnold, D. M. A duality for quasi-isomorphism classes of torsion free modules with finite rank over a discrete valuation ring, 213.

Aronszajn, Nachman. A problem concerning lipschitzian homeomorphisms in Banach spaces, 163.

Arora, K. L. and Gupta, P. R. Hydrodynamic flow due to an axially oscillating infinite cylinder, 757; Magnetohydrodynamic flow due to an axially oscillating infinite cylinder, 837.

Arrison, John D. On a class of algebras satisfying $x(xy) + (yx)x = 2(xy)x$. Preliminary report, 821.

Asenjo, F. Gonzalez. Generalized reals, 948.

Asimow, Leonard A. Extremal structure of closed convex sets, 503.

Atalla, Robert E. On the multiplicative behavior of Toeplitz matrices, 1083.

Athreya, K. B. On the supercritical age dependent branching process, 275.

Atneosen, G. H. Some results on arcs in n-books in E^3, 246.

Auchmuty, James Francis G. The generation and topologization of the field of convolution quotients, 974.

Aull, Charles E. Moore spaces and σ-discrete closed refinements, 690; Topological spaces with a σ-point finite base, 760; Sequences and Stone-Čech compactifications. Preliminary report, 851; Notes on separation by continuous functions, 1044.

Ax, James B. On Schanuel's conjectures, 1073.

Axt, Paul and Singletary, Wilson E. Algorithms relating first-order theories to various combinatorial systems, 523.

Avelsgaard, Roger A. On the cohomology of Jordan algebras of a symmetric bilinear form, 1066.

Azpeitia, Alfonso G. An extension of the Farkas-Minkowski theorem, 857.

Bachmuth, Seymour. Vanishing of the "symmetric polynomials." Preliminary report, 144.

MEETINGS OF THE AMS
Abstracts of Contributed Papers, 86, 500, 640, 756, 947, 1043
Calendar of Meetings, 2, 374, 454, 610, 714, 874, 1002
Preliminary Announcements
April: Chicago, Illinois, 70, 376; New York, N. Y., 70, 375; Santa Cruz, California, 377
August: Eugene, Oregon, 477, 611
October: Cambridge, Massachusetts, 741
November: Baton Rouge, Louisiana, 741, 878; Claremont, California, 742, 879; Ann Arbor, Michigan 743, 880
January: Miami, Florida, 882; San Antonio, Texas, 1018, 1019
Programs of Meetings
January: New Orleans, Louisiana, 3
April: New York, New York, 455; Cincinnati, Ohio, 466; Santa Cruz, California, 473
August: Eugene, Oregon, 715
October: Cambridge, Massachusetts, 875
November: Baton Rouge, Louisiana, 1003; Claremont, California, 1009; Ann Arbor, Michigan, 1012
December: Boston, Massachusetts, 1025

MEMORANDA TO MEMBERS, 85, 380, 489, 631, 751, 940, 1039
Abstracts, 1039
Abstracts for 1970 Annual Meeting, 631
Additional Audio Recordings of Mathematical Lectures Available, 1040
Audio Recordings of Mathematical Lectures, 940
Back Issues of the Transactions, 631
Backlog of Mathematical Research Journals, 380, 751
Bulletin of the Australian Mathematical Society, 631
Colloquium Lectures, 941
Committee on the Welfare of Mathematicians and Students in Involuntary Service, 752
Computing and Mathematics, 1040

Mathematical Offprint Service, 632
Mathematical Sciences Employment Register, 941
Memoirs, 489
MOS Reprints, 942
Policy on Reprints, 381, 631
Referendum, 752
Retired Mathematicians, 942
Seminar on Mathematical Problems in the Geophysical Sciences, 489
1969 Summer Institute on Number Theory, 1039
Symposia Information Center, 940
Tax Exemption for British Citizens, 85
Travel Grants: International Congress of Mathematicians, 940

NATIONAL REGISTER REPORT, 478

NEW AMS PUBLICATIONS, 79, 383, 628, 1033

NEWS ITEMS AND ANNOUNCEMENTS, 69, 72, 74, 75, 82, 378, 381, 395, 399, 400, 472, 481, 496, 632, 633, 634, 740, 745, 750, 753, 877, 932, 943, 1008, 1011, 1017, 1031

PERSONAL ITEMS, 80, 396, 488, 625, 748, 936, 1032
Erratum, 939

RESERVATION FORMS, 452, 712, 1000, 1198

SALARY SURVEYS
Annual Salary Survey, 933
Starting Salary for Mathematicians with a Ph.D., 1026

SELECTED LIST OF STIPENDS, 1227

SUMMER INSTITUTES AND GRADUATE COURSES, 385, 491
Institutes, 71, 393, 494
Graduate Courses, 385, 491

SUMMER SEMINAR, 72
Cancellation, 378

TAX STATUS OF GRANTS, 1125

VISITING FOREIGN MATHEMATICIANS, 76, 925, 1041
